Water Products & Features Catalogue

Quality/Durability

Fiberglass is extremely strong, though flexible, and lightweight, with a very high tensile strength. Fibreglass products are known for superior finishes and being lightweight, ideal for easy handling. Inside or outside, the variety of finishes make mardeou products perfect for any location. It is a non-porous material and extremely UV stable, and can withstand extreme heat or frozen weather without affecting the structural ability like warping or becoming brittle like plastic. It does not crack/break easily like concrete/cement and can literally last a lifetime (50+ years). It can easily be repaired or painted and requires very little to no maintenance. It is also fire retardant.

Animal/Plant Health

Fiberglass is non-toxic, and because it is a non-porous material, it does not leech or extract any chemicals into or from soil or water. It has no influence on acidity/alkalinity and it conducts very little heat compared to other materials. This makes it a very safe material for storing animal feed/water and for plant soil. Fibreglass planters are the best for darker coloured pots as it does not conduct the same heat to plant roots like concrete/cement planters. Plastic planters still leech chemicals into the soil.

Why is it more expensive?

The raw materials of fibreglass products are on average 40%+ more expensive than plastic and concrete/cement. The manufacturing process is also more labour intensive. The initial cost might be a bit more than plastic or concrete/cement products, but the quality and durability of at least decades of use and enjoyment and the other benefits stated above, makes it a worthwhile purchase decision. It is a classic case of. "You get what you pay for".

Colours

We provide any colour or colour combinations that you want. We spray paint the majority of our products with 2K automotive paint, which provides a much wider array of colour options, thus any colour you want can be matched. Provide us with the Pantone code or RAL code or a physical sample.

Exterior Finish

On the right is an example of a Textured Pot. This texture is available on any of the pots we manufacture.

Alternatively, the smooth exterior comes as standard.

Water Products & Features

All Mardeou branded pots are handmade at our own facility, Atlantic Fiberglass Products (PTY) Ltd in Montague Gardens in Cape Town, South Africa.

Water Products

GutterBuddy ©

The Gutterbuddy is a wall mounted water tank that is filled with rain water from the gutter downpipe. This unit holds 60L of water, can be mounted at any convenient height and comes with a plastic tap and overflow that exits the Gutterbuddy via gutter piping at its bottom.

Curved Wall Water Tank ©

This tank with its smooth curved exterior holds 750L of water, only occupies 500mm from a wall and fits through a standard doorway. This tank only weighs 30kg and comes as standard with a plastic tap.

Features

Three Tier Water Feature

This water feature has two shallow tiers and a reservoir tier. This unit comes as standard with spill point and flexible hose. The back side of the feature has a circular hole to pass through the plug and electric for a pump.

Rock Pond

This pond resembles a natural stone pond. This pond is complimented with a waterfall piece, seen below.

Waterfall for Rock Pond

The waterfall has a spill point included. It is free standing and can be placed anywhere on the rock pond.

Koi Pond

This pond is ideal for small fish or animals that require or prefer a water source. This pond is designed to go in the earth, with a flange that lies on the surface.

Artificial Rock Light large

This rock has a light fixed on the inside so that the rock becomes a glowing feature.

Artificial Rock large

This unit resembles a large natural rock in a strong earthy brown.

Artificial Rock medium

This unit resembles a flat substantial sized rock, displayed in a dark sunburnt brown finish.

Artificial Rock small

This unit resembles a small natural rock in three colours, sunburnt brown, dark speckled stone and light speckled stone.
